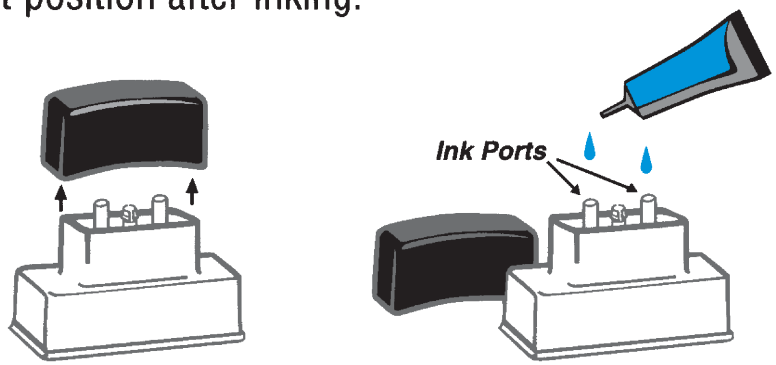
Caution:

- Only Use MaxLight™ Ink in MaxLight™ Stamps
- Only Use Original Color When Re-Inking Your Stamp
- Mix Colors Can Damage Your Stamp
- Follow Instructions Carefully.
- DO NOT OVER INK.
- If ink gets on hands:
  - Rub with rubbing alcohol
  - Then wash with soap and water.

How to re-ink your MaxLight™ Stamp:

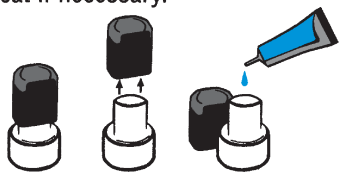
- Remove the handle and place the required amount of MaxLight™ ink in the ink ports. Sizes do vary, so the amount of ink is determined by the size/model number. Divide the quantity of drops between the two ink ports. For ink amounts, refer to back side of this sheet. Let the stamp sit overnight. If the impression is still too light, repeat.
- Always re-ink with the same color of the original stamp.
- Leave stamp in upright position after inking.



For best results, use MaxLight™ Ink only. Other types of ink may damage your stamp.

Re-inking a pre-inked inspector stamp:

- Remove handle & apply 3-4 drops of same color ink in the back of the stamp.
- Leave stamp in upright position after inking.
- Repeat if necessary.



Other points to consider about your pre-inked stamp:

- The type of paper the impression is made on will determine its drying time. Your stamp is not intended for use with glossy paper.
- The dust cover allows you to keep your stamp clean when not in use. If the surface of the stamp does get dirty, place cellophane tape directly on the stamp surface and remove. The tape will remove loose particles and enable the stamp to make better impressions.
- If you get ink on your fingers, use rubbing alcohol and then soap and water.
- To avoid stains, keep away from clothing.
- Keep your pre-ink stamp away from children.

PRE-INK SIZES & INK QUANTITIES:

Sizes 55, 75, 325, 305 = **3-4 Drops**
Sizes 115, 125, 145 = **4-6 Drops**
Sizes 185, 265 = **6-8 Drops**
Sizes 165, 535 = **8-10 Drops**
Size 245 = **10-12 Drops**
Size 225 = **12-14 Drops**
Size 275 = **15-20 Drops**
Size 700 = **20-24 Drops**
Size 750, 800 = **20-24 Drops**

IMPORTANT NOTE: Divide the quantity of drops between the 2 ink ports.
