The TIMBER TAGGER is a time saving tool that, when attached to a pneumatic staple gun, can advance, cut and staple tags with a single pull of the trigger. The TIMBER TAGGER applies a special die cut tag at high speed; over three tags a second in the hands of an experienced operator, and can easily reach over an inch into unevenly stacked bundles of lumber.

The TIMBER TAGGER is easily mounted on a light wire pneumatic staple gun. It is designed and engineered to apply millions and millions of Timber Tagger Tags. When the staple gun needs cleaning or repair, the TIMBER TAGGER can easily be detached and mounted to another in seconds with only one screw.

Weight: 4.6 lbs. without tags

Air requirements: compressed filtered air, 4 SCFM at 70 to 85 air regulator, filter, and lubricant (oiler), and air dryer. (recommended)

Application rate:

Model TT-1 cycles 3 or more tags per second.

Model TT-2 cycles 2 or more tags per second.

Staple size: 3/8" crown.
